The Argos prices shown in this catalogue are generally compiled with Recommended or Suggested Retail prices provided by our suppliers. Our suppliers adopt a policy of continuous improvement. Hence there may be slight variations in the catalogue, minor variations in models, specifications and colours.

All quartz watches are dependent on batteries for their power source. Accordingly, customers returning watches with expired batteries will be charged for the fitting of replacements.

Watches that are designated splash proof are suitable for wearing whilst water is being splashed but NOT under any pressure i.e. swimming and showering.

Watches that are designated water resistant have been tested to 50 metres and/or water pressure unless otherwise stated. These watches are suitable for wearing whilst swimming.

Now you can choose telephone products in the same way as you choose all your other household items. You buy your telephones outright and you only pay rental on the exchange line.

All Answerall telephones are fully approved for use with British Telecom systems. They plug straight into the new single B.T. (tele-cable). What if you don't have the new single British Telecom (tele-cable)? Simply telephone your local B.T. sales office for information on how they can convert your existing connection point.

The number of telephones you can connect to a line is determined by the "Wing Equivalent Number" (REN) of each telephone you wish to connect. The maximum REN for a B.T. line is 4. This means for example, three maximum of 4 telephones each with a REN of 1 could be connected to the same line.

Remember, when you buy your phone, you only pay rental on the exchange line.

CAR COMBINATIONS. There are two different standard stereo car combinations now generally available and these offer ease and method of fitting.

DIN E - latest standard design usually fits almost all cars made since approximately 1980. PHILIPS DIN E can be fitted without any car modification of the dashboard aperture (single harness) to accept the greater height.

DIN C - slightly smaller than DIN E and will fit almost every type of car but may require simple adapter plate (available from car accessory stores or your local retailer) to suit your vehicle specifications manual or vehicle manufacturer.
